The Mississippi Hospital Association and Care Continuity, Inc. are partnering to launch IntelliTrue - A cloud based Health Information Exchange (HIE) platform designed to support MHA's members, providers, and most importantly, the patients of Mississippi.

# What Comes First?

### ADT Notifications (Current Release)

**IntelliTrue** will automatically send real-time email or text notifications to the physician or physician's office about ED visits, inpatient admits, inpatient discharges, and other events for established patients. Each provider and office user can customize notifications as desired to meet their needs.

## What's Next?

#### **Clinical Documents**

IntelliTrue has already interfaced with over 90 acute care hospitals across the state to receive patient event notifications (ADTs). In 2023, IntelliTrue will continue to add Clinical Documents, including notes, imaging reports, and labs.

# Let's Get Started!

For more information visit the website www.carecontinuity.com/mha.

To get access, contact your hospital representative.

Connecting patients to the right care at the right time...every time.
